

## Computer Awareness MCQs for Competitive Exams

### Computer Aptitude Questions PDF Download

#### One Line Linear Question

- WORM stands for? – Write Once Read Memory
- Memory unit is a part of \_\_\_ -Central Processing Unit
- \_\_\_\_\_ companies developed MS Office-2000? – Microsoft
- What is the meaning of \_MICR'? -Magnetic Ink Character Recognition
- VIRUS stands for\_\_\_\_\_ -Vital Information Resource Under Seize
- The technique that extends storage capacities of main memory beyond the actual size of the main memory is called \_\_\_\_ – Virtual storage
- \_\_\_\_\_Command we can use to close the windows. – Alt+F4
- Algorithm is used ---- -To describe a set of procedure by given result is obtained
- FOXPRO is a ----. -Language
- Who is considered to the father of computers? -Charles Babbage
- \_\_\_\_\_ will connect you to the Internet? -An Internet service provider
- What software allows you to view internet sites? – A browser
- When more than one window is open, to switch to the next window—is the key combination. CTRL+F6
- Where are data and program stored when the processor uses them ? – Main memory
- \_\_\_\_\_Represents raw facts, where- as.....is a meaningful data. – Data, information
- Saving is a process-To copy the document from memory to storage medium
- PNG stands for\_\_\_\_ – Portable Network Graphics
- The maximum Zoom percentage in MS PowerPoint is\_\_\_\_\_. -400%
- A peer-to-peer LAN is an appropriate network architecture for\_\_\_\_.- Home network.≡ ≡ The word \_FTP' stands for\_\_ – File Transit Protocol
- Similar to a hub in an Ethernet network, a \_\_\_\_\_ helps relay data between wireless network nodes. -Wireless access point wireless adapter
- Cell phones use \_\_\_\_\_ to access the Internet. – Micro browser software
- In CSMA/CD, the computer sends a fixed unit of data called a(n)\_\_\_\_\_. – Packet.
- The uniform resource locator (URL) is case sensitive in the \_\_\_\_\_. – Directory
- ASCII is a(n)\_\_\_\_\_. -Encoding standard used to represent letters and characters.
- A global network made up of thousands of privately owned computers and networks is called the: -Internet.
- \_\_\_\_\_ is NOT a basic function of the operating system?- Provide the word processing system.
- \_\_\_\_\_ scrambles a message by applying a secret code?-Encryption
- The Internet began with the development of –ARPANET
- Who designed the first electronic computer – ENIAC ? -Van Neuman
- \_\_\_\_\_ is not a network? -Optical Fiber
- In MICR, C stands for?-Character
- Virtual memory is? Memory on the hard disk that the CPU uses an extended RAM

- \_\_\_\_ is the process of finding errors in software code? -Testing
- What is the shortcut key to “Undo” the last action in a document? -Ctrl + Z
- The programs which are as permanent as hardware and stored in ROM is known as –Firmware
- For creating a document, you use..... Command at File Menu. -New
- Computer uses the\_\_\_\_number system to store data and perform calculations. -Binary
- ..... is the process of carrying out commands. -Executing
- In word, when you indent a paragraph, you....-push the text in with respect to the margin
- ASCII stands for \_\_\_\_\_. American Standard Code for Information Interchange
